

Want Assurance that your Calibration Gas cylinders are Empty?

Try the M/T Plug Today!

When your ecosmart cylinder is empty or expired, leave the M/T plug installed for shipment. This offers additional safety assurance to the carrier or other that the cylinder is in fact empty and non-hazardous.

In 2007, Gasco launched an alternative replacement to disposable cylinders. (Since that time, competitors have tried to catch up)

Being innovative and having the wherewithal to take care of Distributors and End Users, puts Gasco in the lime light as the **#1 Choice Calibration Gas Manufacturer today!**

Gasco will continue to succeed by taking care of customers.

Each **ecosmart™** purchase comes with an M/T tool. Returning your ecosmart cylinder is completely free.

1. When Cylinder is ready to be returned, install eco M/T plug for shipment
2. PEEL off label wrap by pulling on perforated strip
3. Request a prepaid label by going to www.gascogas.com Click on the ecosmart Returns button, complete form. Submit. Label will generate and print through links at the top of the page.
4. Prepare a box with adequate packing material and ship to Gasco

ecosmart™ Cylinders make earth sense. Reduce, Reuse and Recycle today!
