* 4 First-aid measures

- **Description of first aid measures**
  - **General information:**
    Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.
  - **After inhalation:**
    Supply fresh air. If required, provide artificial respiration. Consult doctor if symptoms persist.
    In case of unconsciousness, place patient securely on side position for transportation.
  - **After skin contact:**
    In cases of contact with liquified material, frostbite may occur. Immerse frostbite in cool-warm water and seek medical attention.
    Wash with soap and water.
    If skin irritation occurs, consult a doctor.
  - **After eye contact:**
    Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.
  - **After swallowing:**
    Not a normal route of entry.
    If swallowed and symptoms occur, consult a doctor.
  - **Information for doctor:**
    - **Most important symptoms and effects, both acute and delayed:** No further relevant information available.
    - **Indication of any immediate medical attention and special treatment needed**
      No further relevant information available.

* 5 Fire-fighting measures

- **Extinguishing media**
  - **Suitable extinguishing agents:** Use water spray to cool fire-exposed containers.
  - **Special hazards arising from the substance or mixture**
    Closed containers may explode when exposed to extreme heat.
    If incinerated, product will release the following toxic fumes: Oxides of Carbon, Nitrogen (NOx) and Sulfur.
  - **Advice for firefighters**
    This gas mixture is not flammable; however, containers, when involved in fire, may rupture or burst in the heat of the fire. Firefighters should be aware of the presence of Hydrogen Sulfide in this gas mixture, which can cause significant health effects.
  - **Protective equipment:**
    As in any fire, wear self-contained breathing apparatus pressure-demand (NIOSH approved or equivalent), and full protective gear to prevent contact with skin and eyes.

* 6 Accidental release measures

- **Personal precautions, protective equipment and emergency procedures**
  In a confined area, NIOSH approved respiratory protection may be required.
  Treat any fumes as toxic.

## 7 Handling and storage

### Handling:

#### Precautions for safe handling
Ensure good ventilation/exhaustion at the workplace.
Be aware of any signs of dizziness or fatigue; exposures to fatal concentrations of this gas mixture could occur without any significant warning symptoms due to the potential for oxygen deficiency (simple asphyxiation). Do not attempt to adjust, repair or in any other way modify the cylinders containing this gas mixture. If there is a malfunction or another type of operational problem, contact nearest distributor immediately.

#### Information about protection against explosions and fires:
Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C, i.e. electric lights. Do not pierce or burn, even after use.
Do not cut, grind or weld on container that contains or contained product.
Do not spray on a naked flame or any incandescent material.

#### Conditions for safe storage, including any incompatibilities
Store away from strong oxidizing agents, strong bases, phosphorous, organic materials, powdered metals and Zinc.

### Storage:

#### Requirements to be met by storerooms and receptacles:
Store in a cool location.
Cylinders should be firmly secured to prevent falling or being knocked over. Cylinders must be protected from the environment, and preferably kept at room temperature. Cylinders should be stored in dry, well-ventilated areas, away from sources of heat, ignition, and direct sunlight. Protect cylinders against physical damage. Full and empty cylinders should be segregated. Use a “first-in, first-out” inventory system to prevent full containers from being stored for long periods of time.

#### Information about storage in one common storage facility:
Not required.

#### Further information about storage conditions:
Keep receptacle tightly sealed.
Store in cool, dry conditions in well sealed receptacles.

### Specific end use(s)
No further relevant information available.

## 8 Exposure controls/personal protection

### Additional information about design of technical systems:
No further data; see section 7.

### Control parameters
All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94). Use mechanical (general) ventilation for storage areas. Use appropriate ventilation as required to keep Exposure Limits in Air below TLV & PEL limits.
