### 4 First-Aid Measures

- **Description of first aid measures:**
  - **After inhalation:**
    Generally the product does not irritate with inhalation.
    Supply fresh air. If required, provide artificial respiration. Consult doctor if symptoms persist.
    In case of unconsciousness place patient stably in side position for transportation.

(Contd. on page 3)
**5 Fire-Fighting Measures**

- **Extinguishing media:**
  - Suitable extinguishing agents: Use water spray to cool fire-exposed containers.
  - Special hazards arising from the substance or mixture:
    - Closed containers may explode when exposed to extreme heat.
    - If incinerated, product will release the following toxic fumes: Oxides of Carbon, Nitrogen (NOx) and Sulfur.
  - Advice for firefighters:
    - This gas mixture is not flammable; however, containers, when involved in fire, may rupture or burst in the heat of the fire. Firefighters should be aware of the presence of Hydrogen Sulfide in this gas mixture, which can cause significant health effects.
  - Protective equipment:
    - As in any fire, wear self-contained breathing apparatus pressure-demand (NIOSH approved or equivalent) and full protective gear to prevent contact with skin and eyes.

**6 Accidental Release Measures**

- **Personal precautions, protective equipment and emergency procedures:**
  - In a confined area, NIOSH approved respiratory protection may be required.
  - Treat any fumes as toxic.
  - Ensure adequate ventilation.
  - Keep people at a distance and stay upwind.
  - Environmental precautions: Inform authorities in case of gas release.
  - Methods and material for containment and cleaning up:
    - Dispose contaminated material as waste according to section 13.
    - Ensure adequate ventilation.
    - Dispose of the collected material according to regulations.
  - Reference to other sections:
    - See Section 7 for information on safe handling.
    - See Section 8 for information on personal protection equipment.
    - See Section 13 for disposal information.

**7 Handling and Storage**

- **Handling**
  - Precautions for safe handling:
    - Ensure good ventilation/exhaustion at the workplace.

(Contd. on page 4)
Open and handle receptacle with care.
Be aware of any signs of dizziness or fatigue; exposures to fatal concentrations of this gas mixture could occur without any significant warning symptoms due to the potential for oxygen deficiency (simple asphyxiation). Do not attempt to adjust, repair or in any other way modify the cylinders containing this gas mixture. If there is a malfunction or another type of operational problem, contact nearest distributor immediately.

**Information about protection against explosions and fires:**
Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C, i.e. electric lights. Do not pierce or burn, even after use.
Keep protective respiratory device available.
Do not cut, grind or weld on container that contains or contained product.
Do not spray on a naked flame or any incandescent material.

**Conditions for safe storage, including any incompatibilities:**
Store away from strong oxidizing agents, strong bases, phosphorous, organic materials, powdered metals and Zinc.

**Storage**

**Requirements to be met by storerooms and receptacles:**
Store in a cool location.
Cylinders should be firmly secured to prevent falling or being knocked over. Cylinders must be protected from the environment, and preferably kept at room temperature. Cylinders should be stored in dry, well-ventilated areas, away from sources of heat, ignition, and direct sunlight. Protect cylinders against physical damage. Full and empty cylinders should be segregated. Use a “first-in, first-out” inventory system to prevent full containers from being stored for long periods of time.

**Information about storage in one common storage facility:** Not required.

**Further information about storage conditions:**
Keep receptacle tightly sealed.
Store in cool, dry conditions in well sealed receptacles.

**Specific end use(s):** No further relevant information available.

### 8 Exposure Controls/Personal Protection

**Additional information about design of technical systems:** No further data; see section 7.

**Control parameters:**
All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94). Use mechanical (general) ventilation for storage areas. Use appropriate ventilation as required to keep Exposure Limits in Air below TLV & PEL limits.
