Trade name: Precision Calibration Gas Mixture**Special hazards arising from the substance or mixture:**

Closed containers may explode when exposed to extreme heat.

If incinerated, product will release the following toxic fumes: Oxides of Nitrogen (NO_x) and Carbon, and Hydrofluoric Acid gas.

Advice for firefighters:

This gas mixture is not flammable; however, containers, when involved in fire, may rupture or burst in the heat of the fire.

Protective equipment:

As in any fire, wear self-contained breathing apparatus pressure-demand (NIOSH approved or equivalent) and full protective gear to prevent contact with skin and eyes.

6 Accidental Release Measures**Personal precautions, protective equipment and emergency procedures:**

Treat any fumes as toxic.

Ensure adequate ventilation.

Keep people at a distance and stay upwind.

In a confined area, NIOSH approved respiratory protection may be required.

Environmental precautions: Inform authorities in case of gas release.**Methods and material for containment and cleaning up:**

Dispose of the collected material according to regulations.

Reference to other sections:

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

*** 7 Handling and Storage****Handling****Precautions for safe handling:** Ensure good ventilation/exhaustion at the workplace.**Information about protection against explosions and fires:**

Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C, i.e. electric lights. Do not pierce or burn, even after use.

Do not cut, grind or weld on container that contains or contained product.

Do not spray on a naked flame or any incandescent material.

Conditions for safe storage, including any incompatibilities:

Store away from strong bases, strong oxidizing agents, strong reducing agents, phosphorus, phosphorus oxychloride, organic materials, powdered metals and Zinc.

Storage**Requirements to be met by storerooms and receptacles:**

Store in a cool location.

Cylinders should be firmly secured to prevent falling or being knocked over. Cylinders must be protected from the environment, and preferably kept at room temperature. Cylinders should be stored in dry, well-ventilated areas, away from sources of heat, ignition, and direct sunlight. Protect cylinders against physical damage. Full and empty cylinders should be segregated. Use a "first-on, first-out" inventory system to prevent full containers from being stored for long periods of time.

Information about storage in one common storage facility: Not required.**Further information about storage conditions:** Store in cool, dry conditions in well sealed receptacles.**Specific end use(s):** No further relevant information available.*** 8 Exposure Controls/Personal Protection****Additional information about design of technical systems:** No further data; see section 7.
